

KLove is the only radio station my family and I listen to. The programs and music they play on their station is a vital part of our life. It helps keep us encouraged and in a positive frame of mind. The effect on the local community would be devastating if KLOVE were to be displaced by an LPFM broadcaster providing other programming. I hear from people all the time who have said KLOVE has changed their lives in a positive way. Many have said, including me, I don't know what I'd do without KLOVE! This station provides free advertising for local non-profit community events. These events are always an outreach to the public. This station provides a SAFE place for families to tune in without having to worry about what little ears will hear. If we can have families being positively impacted, then it also positively will impact the communities we live in. It makes a better place for all of us to live and work. Please do not allow KLOVE to be displaced.
